# HOUSEFARM

"Healthy Animals, Healthy Nation"

## HOUSEFARM LIMITED

### Optimizing Animal Nutrition for Peak Performance.

At HOUSEFARM LIMITED, we are committed to providing premium-quality feed additives that promote livestock health and improve farm profitability.

#### Our solutions are designed to:

- Mitigate mycotoxin risks
- Enhance gut health
- Improve feed efficiency
- Support optimal growth and productivity

With scientifically formulated products offering maximum bioavailability, stability, and efficacy, we empower farmers to produce healthier, more productive animals—sustainably and cost-effectively.

#### Species We Serve

Cattle

Poultry

Swine

Pets

Aquaculture

#### Trusted Global Partnerships

Our product excellence is backed by collaborations with world-renowned industry leaders:

## TOXO<sup>®</sup>-MX

**Description:** A multi-component mycotoxin binder designed to neutralize a wide range of harmful mycotoxins in animal feed. Ideal for use in moderate-risk feed situations.

**Composition:** Smectite Clay

### Benefits

- Broad-spectrum mycotoxin binding
- Supports liver function and immunity
- Reduces health and performance risks
- Enhances feed intake and nutrient utilization

**Dosage:**

☞ 1–2 kg per ton of feed

**Available Package:**

- 25Kg

## TOXO<sup>®</sup>-XL

**Description:** A premium mycotoxin binder formulated for feeds with high mycotoxin contamination risk.

**Composition:** Smectite Clay, Glucose biopolymers, Beta-glucan

### Benefits

- High binding efficacy against Aflatoxin, ZEA, DON, T-2, FUM
- Provides immune and liver protection
- Reinforce Intestinal barrier
- Reduces toxin absorption and circulation
- Supports animal performance

**Dosage:**

☞ 1–2 kg per ton of feed

**Available Package:**

- 25Kg

# Selacid® Green Growth

**Description:** An organic acid blend formulated to control harmful microbes and improve gut health, especially in antibiotic-free poultry systems.

**Composition:** Formic acid, acetic acid, lactic acid, propionic acid, sorbic acid.

## Benefits

- Reduces pathogenic bacteria in gut
- Supports optimal digestion and gut pH
- Controls microbial load in antibiotics-free production
- Enhances feed efficiency

### Dosage:

- ✔ Starters: 2.0 kg/ton
- ✔ Growers: 1.5 kg/ton
- ✔ Finishers/Layers/Breeders: 1.0–2.0 kg/ton

### Available Package:

- 25Kg

# Fylax® Forte HC

**Description:** A liquid mold inhibitor and moisture management solution used to improve feed mill efficiency and prolong feed shelf-life.

**Composition:** Organic acids (propionic, formic), surfactants, phytochemicals, ActiProp® technology.

## Benefits

- Inhibits mold and microbial growth
- Maintains feed freshness and nutritional value
- Enhances pellet quality and process efficiency
- Increases moisture retention in pelleted feed

### Dosage:

- ✔ 0.75–2.0 kg/ton feed
- ✔ Hydrating solution: 10–20 kg/ton (Fylax + water)

### Available Package:

- 1000Kg

# Selko® AlpHa

**Description:** A targeted organic acid blend for improving gut health and maintaining performance under commercial poultry farming conditions.

**Composition:** Formic acid, lactic acid, propionic acid, citric acid, copper salts.

## Benefits

- Promotes healthy microbial balance
- Supports digestion and nutrient absorption
- Fast-acting via water application
- Protects birds from gut-related performance loss

### Dosage:

- 1–2 L per 1,000 L of drinking water

### Available Package:

- 1Kg, 5Kg, 25Kg & 225kg

# Ecobiol® 500

**Description:** A probiotic containing viable spores of *Bacillus amyloliquefaciens* that stabilizes gut microflora in poultry, pigs, and aquaculture.

**Composition:** *Bacillus amyloliquefaciens* CECT 5940, calcium carbonate carrier.

## Benefits

- Promotes gut microbial balance
- Enhances immunity and digestion
- Heat-stable during pelleting
- Compatible with coccidiostats and organic acids

### Dosage:

- Minimum 500 g per ton of feed

### Available Package:

- 25Kg

# SpeoCare™ T60

**Description:** A gut health enhancer containing esterified butyric acid (tributylin) to promote intestinal development and performance.

**Composition:** 60% tributyrin on silicon dioxide carrier.

## Benefits

- Enhances gut morphology and nutrient absorption
- Promotes intestinal cell regeneration
- Stable through feed processing
- Improves growth and feed efficiency

### Dosage:

- ☑ Poultry: 250–1000 g/ton
- ☑ Layers/Breeders: 500–1000 g/ton
- ☑ Swine: 1000–2000 g/ton

### Available Package:

- 25Kg

# Mepron®

**Description:** A rumen-protected DL-Methionine for dairy cows, ensuring methionine availability post-rumen for enhanced milk production.

**Composition:** DL-Methionine  $\geq 85\%$ , coated with protective film, pellet form.

## Benefits

- Supports milk yield and composition
- Improves amino acid balance in ruminant diets
- Stable in feed, silage, and transport
- Minimal dust and easy handling

### Dosage:

- ☑ 10–20 g per cow per day

### Available Package:

- 25Kg

# L-Lysine HCl

**Description:** A critical amino acid for muscle development and efficient growth, especially in monogastric diets.

**Composition:** L-Lysine Hydrochloride  $\geq 98.5\%$ , white powder.

## Benefits

- Improves growth rate and body weight
- Enhances protein deposition
- Optimizes FCR
- Balances amino acid profile in cereal-based diets

### Dosage:

- 0.5–1.5% of feed depending on species and requirements

### Available Package:

- 25Kg

# MetAMINO® DL-Methionine

**Description:** A key amino acid for supporting animal growth and metabolic functions.

**Composition:** DL-Methionine  $\geq 99\%$ , crystalline powder.

## Benefits

- Promotes muscle development and immune health
- Reduces crude protein requirements in feed
- Enhances growth and reproductive performance
- Easily mixed in all feed types

### Dosage:

- Based on species formulation needs

### Available Package:

- 25Kg

EVONIK

SUMITOMO CHEMICAL

# Dicalcium Phosphate (DCP)

**Description:** A mineral feed supplement providing phosphorus and calcium for bone and metabolic support.

**Composition:** Phosphorus ~18%, Calcium ~23%.

## Benefits

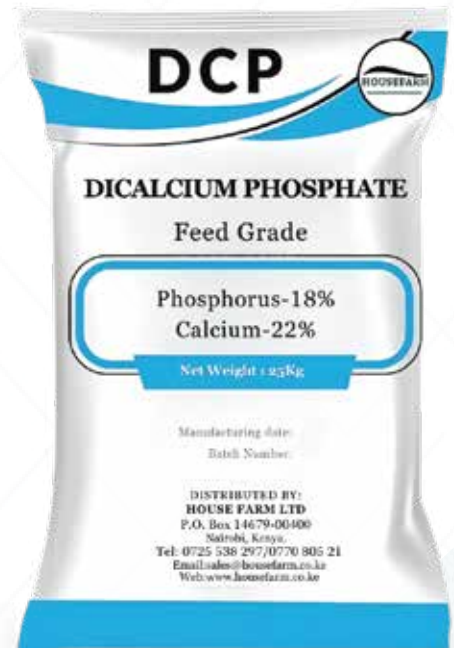

- Promotes strong skeletal development
- Supports eggshell formation
- Improves growth and fertility
- Prevents calcium and phosphorus deficiencies

### Dosage:

- ☞ 0.5–2% depending on species and diet

### Available Package:

- 25Kg

# Monocalcium Phosphate (MCP)

**Description:** A highly bioavailable source of phosphorus and calcium ideal for young and fast-growing animals.

**Composition:** Phosphorus ~22%, Calcium ~15%

## Benefits

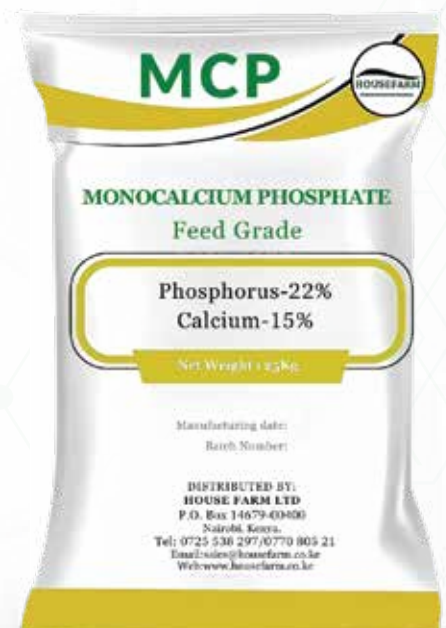

- Enhances nutrient absorption and growth
- Supports reproductive performance
- Improves feed utilization
- Reduces phosphorus excretion

### Dosage:

- ☞ 0.5–1.5% depending on species

### Available Package:

- 25Kg

# ADDITIONAL SERVICES

## 1. Mycotoxin Analysis

### Qualitative & Quantitative Testing

Using the **Mycomaster** rapid test, we provide fast and reliable detection of harmful **mycotoxins** in both feed raw materials and complete feed formulations.

#### **Tested Mycotoxins:**

- Aflatoxin
- DON (Deoxynivalenol)
- Fumonisin
- Zearalenone
- Ochratoxin
- T2-HT2

- ✔ Rapid results – field-applicable and actionable
- ✔ Enhances feed safety and risk management
- ✔ Supports procurement and quality control decisions

## 2. Nutritive Analysis

### Powered by NutriOpt On-site Adviser (NOA)

We offer **instant nutritional profiling** of feed ingredients and finished feeds using a **hand held NIR (Near-Infrared)** device for on-site analysis.

#### **Parameters Measured:**

- Moisture
- Crude Protein
- Fat
- Fiber
- Ash

- ✔ Real-time results to support ration balancing
- ✔ Optimizes formulation accuracy and cost control
- ✔ Ensures consistent feed quality and performance
